

PPE Victory for H+H NYSNA Nurses

New 24/7 Hotline Established for all N95/PPE Needs

**ANY H+H NURSE THAT NEEDS A NEW N95 SHOULD CALL
THE PPE HOTLINE: 646-614-3030**

NYSNA H+H nurses need access to proper PPE like N95 respirators on all units, all shifts, for all types of patients. Our H+H facilities are bearing the brunt of the COVID-19 outbreak, and we finally have the breakthrough on the equipment needed to defeat the virus.

On Monday, the state COVID Task Force directed, "When a direct caregiver in a hospital asks for a new N95 mask they will receive one at least once a day."

Our Union and the Mayor's office are working closer than ever before on coordination of patient care and nursing needs. Your feedback brought about this victory. Now there is a hotline to call if you don't have the protection you need. Call your Rep immediately if you need a new N95, request one from this hotline, and are denied. NYSNA needs to know this and will report it.

Stay strong and be safe. By staying united, we will defeat COVID-19.

► Become an H+H COVID CAT leader!

NYSNA members across the state are standing up and fighting back in order to protect the safety of patients and frontline nurses during the COVID-19 crisis—the COVID ACTION TEAM (CAT)

We are launching a series of special workshops to support members who are stepping up to advocate for their colleagues and collectively address the critical issues facing frontline nurses, including PPE, testing, staffing, safe workplaces, and fair treatment.
